Andhra Pradesh, India

PROFESSIONAL SUMMARY

Aspiring Data Analyst with strong technical foundation in Power BI, Python, SQL, and Excel. Passionate about transforming raw data into actionable insights through data visualization and statistical analysis. Pursuing B.Tech in Computer Science Engineering (Data Science) with hands-on experience in building end-to-end analytics solutions and data-driven decision making frameworks.

EDUCATION

Swarnandhra College of Engineering & Technology

Narasapur, Andhra Pradesh

Bachelor of Technology in Computer Science Engineering (Data Science)

2023 – 2027

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Machine Learning, Statistical Analysis
- Academic Focus: Data Analytics, Business Intelligence, Predictive Modeling, Data Visualization

TECHNICAL SKILLS

Programming Languages: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL)

Data Analytics & BI Tools: Microsoft Power BI (DAX, Power Query), Microsoft Excel (Pivot Tables, VLOOKUP, Advanced Formulas, Macros)

Data Science & ML: Scikit-learn, Statistical Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering

Cloud & Databases: Microsoft Azure AI Fundamentals, SQL Database Management, Data Warehousing

Visualization & Reporting: Interactive Dashboards, KPI Development, Data Storytelling, Business Intelligence Reporting

Additional Skills: Git/GitHub, Jupyter Notebook, Google Analytics, Digital Marketing Analytics, A/B Testing

PROJECTS & ANALYTICS EXPERIENCE

Sales Performance Analytics Dashboard | *Power BI, SQL, Excel*

2024

- Designed and developed interactive Power BI dashboard analyzing sales trends, customer segmentation, and revenue metrics across multiple dimensions
- Implemented DAX calculations for YoY growth, moving averages, and predictive forecasting resulting in 25% improvement in sales planning accuracy
- Created automated ETL pipelines using Power Query to process and transform 100K+ records from multiple data sources
- Delivered actionable insights that identified top-performing products and underperforming regions, enabling strategic resource allocation

Customer Behavior Analysis & Segmentation | *Python, SQL, Matplotlib*

2024

- Performed comprehensive exploratory data analysis on customer transaction dataset with 50K+ records using Python (Pandas, NumPy)
- Applied clustering algorithms (K-Means) to segment customers into 5 distinct groups based on purchasing behavior and demographics
- Created data visualizations using Matplotlib and Seaborn to communicate findings to non-technical stakeholders
- Developed SQL queries to extract, aggregate, and analyze customer metrics including CLV, churn rate, and retention patterns

Financial Data Analysis & Forecasting | *Excel, Python, Statistical Modeling*

2023

- Built comprehensive financial analysis model in Excel with advanced formulas, pivot tables, and conditional formatting for trend analysis
- Implemented time series forecasting using Python to predict quarterly revenue with 85% accuracy
- Automated monthly reporting process reducing manual effort by 60% through Excel macros and Power Query
- Created executive summary dashboards highlighting key financial metrics, variance analysis, and performance indicators

CERTIFICATIONS & LEARNING

Tata - GenAI Powered Data Analytics Job Simulation: Practical experience in leveraging AI for data analytics workflows

Microsoft Certified: Azure AI Fundamentals: Cloud-based AI and machine learning fundamentals on Azure platform

Data Analytics for Beginners: Foundation in statistical analysis, data cleaning, and visualization techniques

Excel Bootcamp: Advanced Excel skills including pivot tables, macros, and complex formula development

AI for All: Understanding of artificial intelligence applications in business and technology

KEY ACHIEVEMENTS & IMPACT

- Developed 5+ end-to-end analytics projects demonstrating proficiency in data pipeline creation, analysis, and visualization
- Achieved Microsoft Azure AI Fundamentals certification, demonstrating cloud computing and AI/ML capabilities
- Built portfolio of Power BI dashboards showcasing ability to translate complex data into executive-ready insights
- Self-driven learner with completed specializations in GenAI-powered analytics, Python programming, and advanced Excel
